SERVING ALL OF SOUTHERN CALIFORNIA SINCE 1967

2019 | WINTER

SMARTPHONE OR TABLET SYSTEM CONTROL

A MESSAGE
FROM OUR CEO

Our Security Officers routinely get requests to check to see if our customers garage doors are open. Did you know your security system can answer that question? Not only that, if the door has been left open you can use our APP to close it from your smartphone.

With today's systems and a smartphone or tablet you can arm and disarm your system, view images from your camera's, control lights, locks and thermostats and more.

If you would like to learn about all the features newer security system have, please call us at 1-800-381-BOYD.

REPLACEMENT SIGNS

Are your alarm signs or decals old, faded or damaged?
Call our office to tell us how many you need and we will deliver new ones for free.

Raymond G. Boyd, C.E.O. Boyd & Associates

GET THREE MONTHS OF FREE MONITORING WHEN YOU REFER A FRIEND!

When you refer your friends to Boyd and Associates, you will receive three months of free monitoring when they sign up for our service. So, pass the word and get free monitoring!

WINTER HEATING INCREASES THE NECESSITY OF CARBON MONOXIDE & MONITORED SMOKE DETECTORS

 During the cold winter months, homeowners heat their homes with fireplaces, furnaces, central heat, space heaters, etc. While heating provides a warm and toasty environment for your family, it can increase the likelihood of home fires and carbon monoxide poisoning. Heating is the second leading cause of home fires, fire deaths, and fire injuries, and an average of 30 to 40 "unavoidable deaths" occur in California each year because of unintentional carbon monoxide poisoning.

California state law requires that single-family homes with an attached garage, fireplace, or gas heater or appliance, install carbon monoxide devices.

Monitored smoke detectors and carbon monoxide detectors can be hardwired into your home alarm system. When smoke or carbon monoxide is detected, a signal is sent to our monitoring station, and emergency responders are immediately dispatched to your home.

A minimal investment in these life saving devices will help safeguard your home, your family and your precious belongings. Call a Boyd & Associates security consultant at 800.381-BOYD for more information. ■

IF YOU OWN AN ALARM SYSTEM, CONSIDER THIS BEFORE CHANGING YOUR TELEPHONE SERVICE PROVIDER...

Many older security systems send signals to our central station through your home's landline telephone. **Before you change your phone service provider, it is imperative that you contact Boyd & Associates to advise us of the impending change and request a service call.** A technician will need to reprogram the system to enable it to send a signal via the specific type of service you choose.

You may want to consider using a cellular connection to enable your alarm system to signal our central station in the event of an alarm activation. Another option is adding cellular back-up, which enables your alarm system to signal the central station in the event of a phone service outage.

Boyd & Associates provides the most up to date security, fire, access control, and CCTV systems, as well as alarm and Interactive Video Monitoring from our local 24-hour central station. If you would like more information about enhanced services, **give us a call at 1-800-381-BOYD.**
